BUG-001

Medium

UI Bug

Login field label is misleading on Registration form

Module: Registration

Steps to Reproduce

1. Open website
2. Click Register
3. See first input field labeled 'Login'

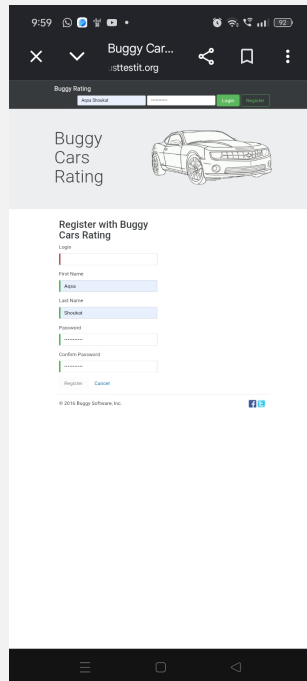

Expected Result

Field should be labeled 'Username' to avoid confusion

Actual Result

Field labeled 'Login' confuses users — looks like a login button

Screenshot

BUG-002

High

UI Bug

Register button hidden when mobile keyboard is open

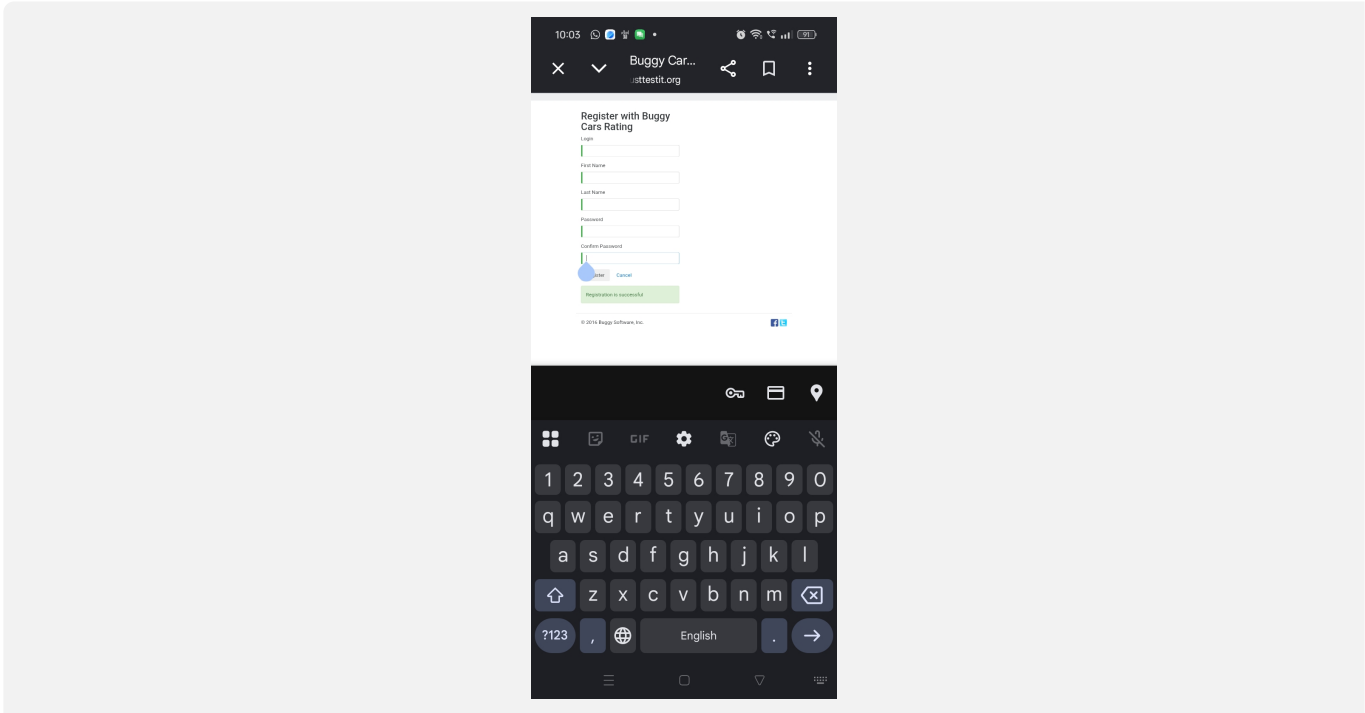

Module: Registration

Steps to Reproduce

1. Open Register page on mobile
2. Fill in all fields
3. Mobile keyboard covers the Register button

Expected Result	Register button should stay visible or page should auto-scroll
Actual Result	Register button completely hidden — user cannot complete registration

Screenshot

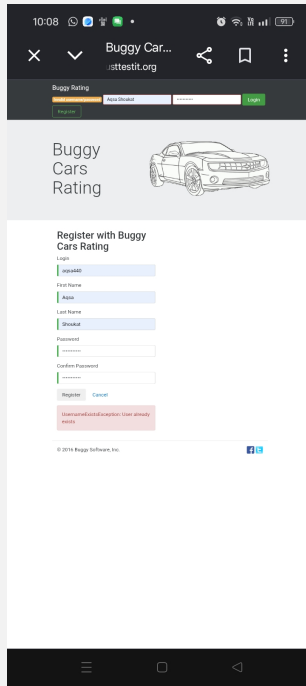

BUG-003	Medium	Error Handling Bug
---------	--------	--------------------

Technical exception message shown on duplicate username

Module: Registration

Steps to Reproduce	1. Register with username 'aqsa440' 2. Try to register again with same username 3. Observe error message
Expected Result	User-friendly message: 'This username is already taken. Please choose another.'
Actual Result	Raw error: 'UsernameExistsException: User already exists'

Screenshot

BUG-004

Medium

Functional Bug

Registration form still visible after successful login

Module: Login / Registration

Steps to Reproduce

1. Register successfully
2. Login with credentials
3. Observe the page

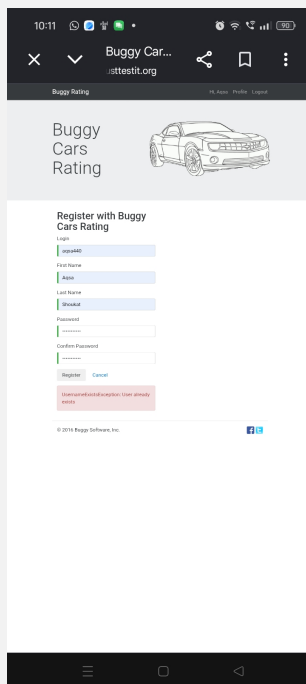

Expected Result

User should be redirected to homepage after login

Actual Result

Registration form still displayed after successful login

Screenshot

BUG-005

Critical

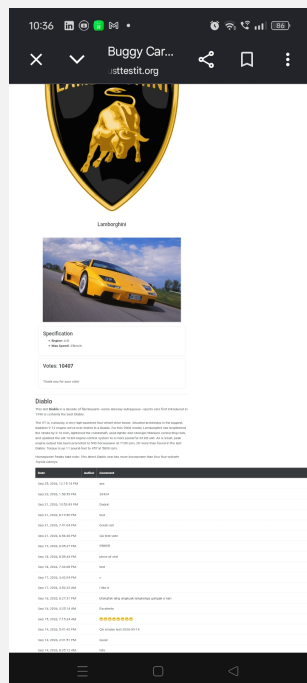

Validation Bug

Abusive and offensive content allowed in comment field

Module: Comments

Steps to Reproduce	1. Login 2. Open any car page 3. Type offensive text in comment 4. Submit
Expected Result	System should block offensive content and show warning
Actual Result	Abusive comments accepted and publicly displayed without any filter

Screenshot

BUG-006

Low

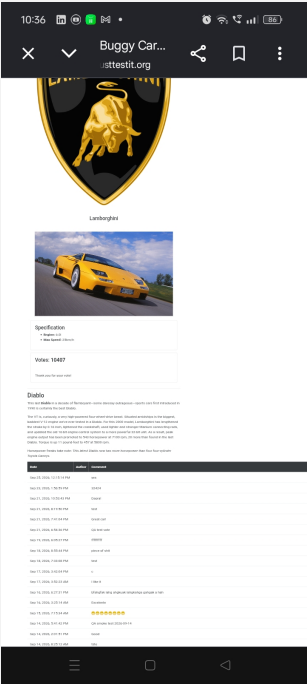

Validation Bug

Single character accepted as valid comment

Module: Comments

Steps to Reproduce	1. Login 2. Open any car page 3. Type single character 'c' 4. Submit
Expected Result	Minimum comment length should be enforced (at least 5 characters)
Actual Result	Single character 'c' accepted and posted as valid comment

Screenshot

BUG-007

High

Functional Bug

Comment input box missing from car detail page

Module: Comments

Steps to Reproduce

1. Login
2. Open any car model page
3. Scroll to bottom of page

Expected Result

Comment input box and Submit button should be visible for logged-in users

Actual Result

No comment input box exists — cannot add new comments
