Manual QA Testing Portfolio

Aqsa Shoukat | Entry level software tester | Faisalabad, Punjab, Pakistan

Open to remote and entry level opportunities

What this portfolio shows

I test by hand on my Android phone. On each site I try the normal flow first and then wrong or unusual input, like empty fields, letters in number fields, zero, negative numbers and values that are too long. Every report has a section called What I did not cover, because I only want to claim what I really tested. The results are my own judgement because I had no requirements documents.

Reports

Report	What I tested	Date	Result
ParaBank	Online banking demo	6 Oct 2026	48 cases: 28 passed, 18 failed, 2 other
OrangeHRM	HR system demo	17 Oct 2026	17 cases: 12 passed, 1 failed, 4 observations
CURA Healthcare	Appointment booking demo	16 Oct 2026	10 issues from exploratory testing on a phone
Swagger Petstore	Public API, tested with Swagger UI	18 and 19 Oct 2026	11 cases: 10 passed, 1 failed
SauceDemo	Online shop demo	Sept 2026	20 cases: 20 passed
Buggy Cars Rating	Car rating site	Sept 2026	7 defects: 1 Critical, 2 High, 3 Medium, 1 Low
Buggy Cars in Jira	Bug tickets BCBT-1 to BCBT-7	Sept 2026	7 tickets in To Do
Website status check	Mini Postman on saucedemo.com	Sept 2026	3 GET requests

Tools

- Android phone browser for all web testing
- Swagger UI and Mini Postman for requests
- Jira for bug tickets
- Screenshots with the phone clock visible as evidence

What I am learning next

- Mobile app testing, not only websites in a phone browser
- Writing functional test cases from my exploratory notes
- Using AI tools such as Claude, Gemini and ChatGPT well in testing work

All testing was done by me by hand on my phone. I used AI tools to help with the layout and wording of these documents.
