Buggy Cars Rating

Bug Report

Prepared by	Aqsa Shoukat
Test date	September 2026
Platform	Android phone, mobile browser
Website	buggy.justtestit.org (Buggy Cars Rating, a practice site for testers)
Areas covered	Registration, Login and Comments
Result	7 defects: 1 Critical, 2 High, 3 Medium and 1 Low
Tracking	The same 7 bugs are logged in Jira as BCBT-1 to BCBT-7
Evidence	One screenshot for each bug

This report shows the bugs I found when I tested the Buggy Cars Rating website by hand on my phone. Each bug has the steps, what I expected, what happened and a screenshot.

1. What I tested

I tested three areas of the website: Registration, Login and Comments. I tried the normal flow first and then wrong or unusual input, like a username that already exists, an offensive comment and a one letter comment. This report covers only these three areas. Other parts of the site, other browsers and other devices are not covered here.
I did not have a requirements document, so the expected results and the severity levels are my own judgement.
Environment: Buggy Cars Rating, Android phone browser, manual testing. Test date: September 2026.

2. Summary of defects

ID	Defect	Area	Severity	Jira
BUG-001	The first field on the Registration form is labeled Login	Registration	**Medium**	BCBT-6
BUG-002	The Register button is hidden when the mobile keyboard is open	Registration	**High**	BCBT-3
BUG-003	A technical error message shows when the username already exists	Registration	**Medium**	BCBT-4
BUG-004	The Registration form is still on the screen after a successful login	Login and Registration	**Medium**	BCBT-5
BUG-005	Abusive and offensive words are allowed in the comment box	Comments	**Critical**	BCBT-1
BUG-006	A single character is accepted as a comment	Comments	**Low**	BCBT-7
BUG-007	The comment box is missing on the car detail page	Comments	**High**	BCBT-2

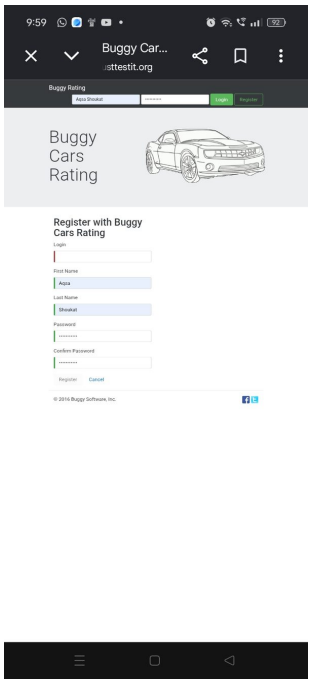

3. Other notes

- BUG-005 and BUG-006 are on the same car page, so they use the same screenshot of the comment list.
- I marked BUG-005 as Critical because abusive text is shown to every visitor. This is my own judgement and another tester may call it High.

4. Detailed defects

BUG-001 The first field on the Registration form is labeled Login — Medium

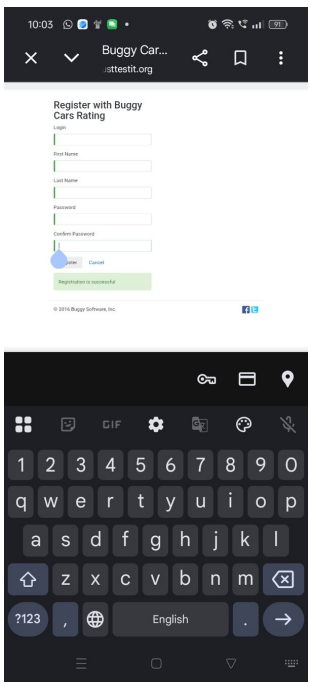

Area	Registration (ui bug)
Steps	1. Open the website 2. Tap Register 3. Look at the first input field
Expected	The field is labeled Username.
Actual	The field is labeled Login. This is confusing because it looks like the Login button.

Screenshot

BUG-002 The Register button is hidden when the mobile keyboard is open — High

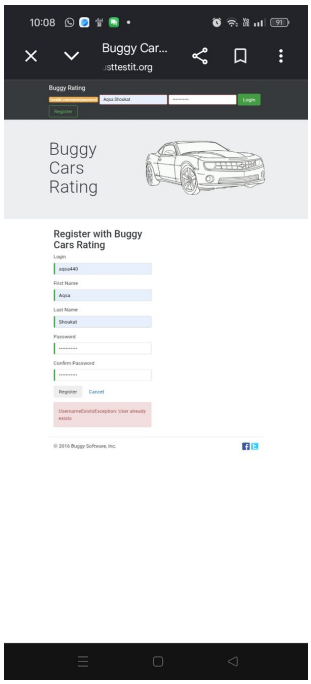

Area	Registration (ui bug)
Steps	1. Open the Register page on a phone 2. Fill in all the fields 3. Look for the Register button while the keyboard is open
Expected	The Register button stays visible, or the page scrolls up on its own.
Actual	The keyboard covers the Register button completely. The user cannot finish registration without closing the keyboard.

Screenshot

BUG-003 A technical error message shows when the username already exists — Medium

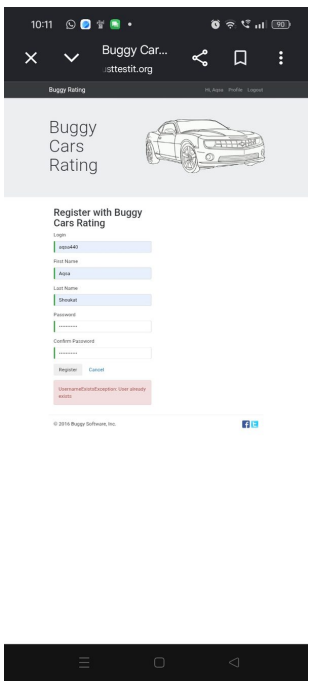

Area	Registration (error handling bug)
Steps	1. Register with the username aqsa440 2. Try to register again with the same username 3. Look at the error message
Expected	A simple message such as: This username is already taken. Please choose another one.
Actual	A raw technical error shows: UsernameExistsException: User already exists.

Screenshot

BUG-004 The Registration form is still on the screen after a successful login — Medium

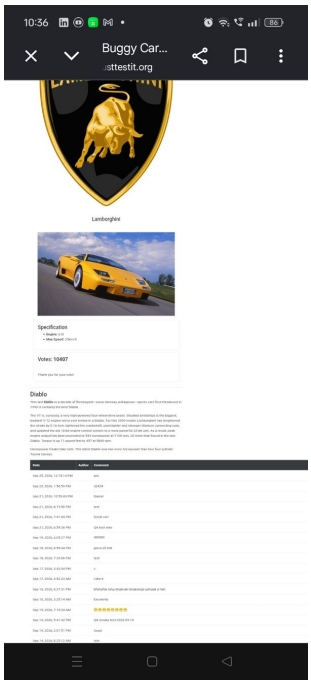

Area	Login and Registration (functional bug)
Steps	1. Register a new user 2. Log in with the same details 3. Look at the page
Expected	The user goes to the home page after login.
Actual	The Registration form is still shown after the login worked.

Screenshot

BUG-005 Abusive and offensive words are allowed in the comment box — Critical

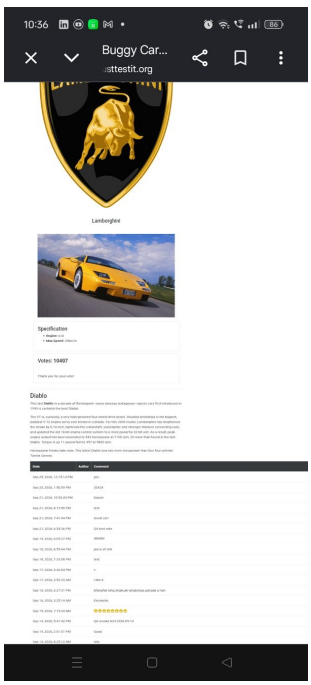

Area	Comments (validation bug)
Steps	1. Log in 2. Open any car page 3. Type an offensive comment 4. Tap Submit
Expected	The system blocks the comment and shows a warning.
Actual	The abusive comment was accepted and shown on the page. There is no filter.

Screenshot

BUG-006 A single character is accepted as a comment — Low

Area	Comments (validation bug)
Steps	1. Log in 2. Open any car page 3. Type one character: c 4. Tap Submit
Expected	There is a minimum length for comments. I used 5 characters as my own guess.
Actual	The single character c was accepted and posted as a normal comment.

Screenshot

BUG-007 The comment box is missing on the car detail page

High

Area	Comments (functional bug)
Steps	1. Log in 2. Open any car model page 3. Scroll to the bottom of the page
Expected	A comment box and a Submit button show for a logged-in user.
Actual	There is no comment box on the page, so the user cannot add a new comment.
