

SQA / Software Testing

Login Module — 25 Test Cases

Project: E-Commerce Web Application

Purpose: Interview preparation ke liye Login Module ki manual/functional testing practice. Har test case simple Roman Urdu mein likha gaya hai taake concept easily samajh aaye aur interview mein explain kiya ja sake.

Standard Test Case Format: Test Case ID • Test Scenario • Preconditions • Test Steps • Test Data • Expected Result • Actual Result • Status

TC_LOGIN_001 — Login with valid email and valid password

Test Case ID	TC_LOGIN_001
Test Scenario	Login with valid email and valid password
Preconditions	User login page par ho.
Test Steps	1. Valid email enter kare. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Email: testuser@gmail.com Password: Valid@123
Expected Result	User successfully login ho jana chahiye aur dashboard/home page open ho jana chahiye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_002 — Login with invalid email and invalid password

Test Case ID	TC_LOGIN_002
Test Scenario	Login with invalid email and invalid password
Preconditions	User login page par ho.
Test Steps	1. Invalid email enter kare. 2. Invalid password enter kare. 3. Login button par click kare.
Test Data	Email: wrong@gmail.com Password: Wrong@123
Expected Result	Login nahi hona chahiye aur appropriate error message show hona chahiye, e.g. "Invalid email or password."
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_003 — Login with valid email and invalid password

Test Case ID	TC_LOGIN_003
Test Scenario	Login with valid email and invalid password
Preconditions	User login page par ho.

Test Steps	1. Valid email enter kare. 2. Wrong password enter kare. 3. Login button par click kare.
Test Data	Email: testuser@gmail.com Password: Wrong@123
Expected Result	Login nahi hona chahiye aur appropriate error message show hona chahiye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_004 — Login with valid email and empty password

Test Case ID	TC_LOGIN_004
Test Scenario	Login with valid email and empty password
Preconditions	User login page par ho.
Test Steps	1. Valid email enter kare. 2. Password field empty chhor de. 3. Login button par click kare.
Test Data	Email: testuser@gmail.com Password: Empty
Expected Result	Login nahi hona chahiye aur password field ke neeche appropriate validation message show hona chahiye, e.g. "Password is required."
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_005 — Login with empty email and valid password

Test Case ID	TC_LOGIN_005
Test Scenario	Login with empty email and valid password
Preconditions	User login page par ho.
Test Steps	1. Email field empty chhor de. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Email: Empty Password: Valid@123
Expected Result	Login nahi hona chahiye aur email field ke neeche appropriate validation message show hona chahiye, e.g. "Email is required."
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_006 — Login with both email and password empty

Test Case ID	TC_LOGIN_006
Test Scenario	Login with both email and password empty
Preconditions	User login page par ho.

Test Steps	1. Email field empty chhor de. 2. Password field empty chhor de. 3. Login button par click kare.
Test Data	Email: Empty Password: Empty
Expected Result	Login nahi hona chahiye aur email aur password dono ke liye appropriate validation messages show hone chahiye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_007 — Login with invalid email format

Test Case ID	TC_LOGIN_007
Test Scenario	Login with invalid email format
Preconditions	User login page par ho.
Test Steps	1. Email field mein invalid email format enter kare, e.g. testuser@. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Email: testuser@ Password: Valid@123
Expected Result	Login nahi hona chahiye aur email field ke liye appropriate validation message show hona chahiye, e.g. "Please enter a valid email address."
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_008 — Login with leading/trailing spaces in email

Test Case ID	TC_LOGIN_008
Test Scenario	Login with leading/trailing spaces in email
Preconditions	User login page par ho.
Test Steps	1. Email field mein valid email ke start/end par spaces ke sath enter kare. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Email: testuser@gmail.com Password: Valid@123
Expected Result	Application ko email ke unnecessary spaces ko properly handle karna chahiye. Agar email valid hai to expected login behavior hona chahiye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_009 — Password visibility / eye icon

Test Case ID	TC_LOGIN_009
Test Scenario	Password visibility / eye icon
Preconditions	Login page par ho.

Test Steps	1. Password enter kare. 2. Eye icon par click kare. 3. Dobara eye icon par click kare.
Test Data	Password: Valid@123
Expected Result	First click par password visible ho aur second click par password dobara masked/hidden ho jaye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_010 — Login button with valid credentials

Test Case ID	TC_LOGIN_010
Test Scenario	Login button with valid credentials
Preconditions	Valid registered account available ho.
Test Steps	1. Valid email enter kare. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Valid email + Valid password
Expected Result	Login button request submit kare aur successful login ho jana chahiye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_011 — Login button with required fields empty

Test Case ID	TC_LOGIN_011
Test Scenario	Login button with required fields empty
Preconditions	User login page par ho.
Test Steps	1. Email aur password fields empty rakhe. 2. Login button par click kare.
Test Data	Email: Empty Password: Empty
Expected Result	Invalid submission prevent honi chahiye aur required-field validation messages show hone chahiye.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_012 — Email field accepts valid email length

Test Case ID	TC_LOGIN_012
Test Scenario	Email field accepts valid email length
Preconditions	User login page par ho.
Test Steps	1. Supported length ka valid email enter kare. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	A valid email within supported length Password: Valid@123

Expected Result	Valid email accept ho aur normal authentication proceed ho.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_013 — Password field masks typed characters

Test Case ID	TC_LOGIN_013
Test Scenario	Password field masks typed characters
Preconditions	User login page par ho.
Test Steps	1. Password field select kare. 2. Password type kare.
Test Data	Password: Valid@123
Expected Result	Password type karte waqt characters default mein masked/hidden hon.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_014 — Login page validation / UI coverage

Test Case ID	TC_LOGIN_014
Test Scenario	Login page validation / UI coverage
Preconditions	User login page par ho.
Test Steps	1. Login page ki fields aur buttons inspect kare. 2. Required validations aur UI behavior requirements ke against check kare.
Test Data	As per application requirements
Expected Result	Login page ki UI aur validation requirements/documentation ke mutabiq properly work kare.
Actual Result	Pass / Fail
Status	Completed

TC_LOGIN_015 — Login with email containing internal spaces

Test Case ID	TC_LOGIN_015
Test Scenario	Login with email containing internal spaces
Preconditions	User login page par ho.
Test Steps	1. Email mein internal space wala invalid value enter kare. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Email: test user@gmail.com Password: Valid@123
Expected Result	Invalid email reject ho aur clear validation message show ho.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_016 — Password minimum boundary length

Test Case ID	TC_LOGIN_016
Test Scenario	Password minimum boundary length
Preconditions	Password ki minimum length requirement known ho.
Test Steps	1. Minimum allowed length se exactly 1 character kam password enter kare. 2. Valid email enter kare. 3. Login button par click kare.
Test Data	Password: Minimum se 1 character kam
Expected Result	Agar minimum length enforce hai to validation message show ho aur invalid authentication request prevent ho.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_017 — Password minimum valid boundary

Test Case ID	TC_LOGIN_017
Test Scenario	Password minimum valid boundary
Preconditions	Password ki minimum length requirement known ho.
Test Steps	1. Exactly minimum allowed length ka password enter kare. 2. Valid email enter kare. 3. Login button par click kare.
Test Data	Password: Exactly minimum length
Expected Result	Minimum allowed length ka password accept ho aur authentication behavior requirements ke mutabiq ho.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_018 — Password maximum boundary

Test Case ID	TC_LOGIN_018
Test Scenario	Password maximum boundary
Preconditions	Password ki maximum length requirement known ho.
Test Steps	1. Maximum supported length ka password enter kare. 2. Login attempt kare.
Test Data	Password: Maximum supported length
Expected Result	Application maximum supported length ko correctly handle kare aur unexpected truncation/error na ho.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_019 — Very long password input

Test Case ID	TC_LOGIN_019
Test Scenario	Very long password input

Preconditions	User login page par ho.
Test Steps	1. Bohat long password type ya paste kare. 2. Login button par click kare.
Test Data	Password: Very long string
Expected Result	Application safely handle kare; UI break/crash na ho aur appropriate validation/authentication response mile.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_020 — Password special characters

Test Case ID	TC_LOGIN_020
Test Scenario	Password special characters
Preconditions	Valid account available ho.
Test Steps	1. Password mein supported special characters use kare. 2. Login button par click kare.
Test Data	Password containing: @ # \$ % &
Expected Result	Supported special characters correctly accept hon aur valid credentials ke sath expected authentication ho.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_021 — Email case handling

Test Case ID	TC_LOGIN_021
Test Scenario	Email case handling
Preconditions	Registered email known ho.
Test Steps	1. Same email ko different capital/small letter casing mein enter kare. 2. Valid password enter kare. 3. Login button par click kare.
Test Data	Email: TESTUSER@GMAIL.COM Password: Valid@123
Expected Result	Application email case handling ko requirements ke mutabiq consistently apply kare; valid account ko unexpectedly reject na kare.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_022 — Multiple failed login attempts

Test Case ID	TC_LOGIN_022
Test Scenario	Multiple failed login attempts
Preconditions	Login page par ho.
Test Steps	1. Wrong password se multiple login attempts kare. 2. Har attempt ka response observe kare.

Test Data	Same valid email + wrong password
Expected Result	Application defined failed-attempt behavior follow kare, jaise appropriate error, rate limiting, temporary lockout ya CAPTCHA agar required ho.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_023 — Forgot Password navigation

Test Case ID	TC_LOGIN_023
Test Scenario	Forgot Password navigation
Preconditions	Login page par ho.
Test Steps	1. Forgot Password link par click kare.
Test Data	N/A
Expected Result	User ko password-recovery/reset page ya process par correctly navigate hona chahiye.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_024 — Password case sensitivity

Test Case ID	TC_LOGIN_024
Test Scenario	Password case sensitivity
Preconditions	Registered account available ho.
Test Steps	1. Registered email enter kare. 2. Password enter kare lekin capital/small letters change kar dein. 3. Login button par click kare.
Test Data	Email: testuser@gmail.com Registered Password: Valid@123 Entered Password: valid@123
Expected Result	Login successful nahi hona chahiye, kyunki password case-sensitive hota hai.
Actual Result	Pass / Fail
Status	Planned

TC_LOGIN_025 — Login after successful authentication

Test Case ID	TC_LOGIN_025
Test Scenario	Login after successful authentication
Preconditions	Valid account available ho.
Test Steps	1. Valid credentials se login kare. 2. Dashboard open hone ke baad browser back/refresh behavior check kare. 3. Protected page access observe kare.
Test Data	Valid email + Valid@123
Expected Result	Authenticated user ko expected protected area access mile aur unauthorized state mein sensitive/protected data expose na ho.

Actual Result	Pass / Fail
Status	Planned

Interview Quick Revision

What is a test case?

Test case ek detailed set hota hai jisme preconditions, steps, test data, expected result, actual result aur status hota hai.

Scenario vs Test Case

Scenario batata hai **WHAT to test**; test case batata hai **HOW to test**.

Positive Testing

Valid input ke sath expected successful behavior check karna.

Negative Testing

Invalid, missing, unexpected ya boundary input ke against application ka behavior check karna.

Why test empty fields?

Ye check karne ke liye ke required-field validation properly kaam kar rahi hai.

Why test boundary values?

Minimum aur maximum limits ke aas-paas defects find karne ke liye.

What is a bug?

Expected behavior aur actual behavior ke darmiyan mismatch/defect.

Actual Result kab fill hota hai?

Manual testing ke waqt actual application behavior observe karne ke baad.

If login fails with valid credentials?

Issue reproduce karein, evidence capture karein, requirements se compare karein aur clear bug report banayein jisme steps, expected vs actual result, severity aur priority ho.

Next SQA Stage: In 25 test cases ko manually execute karna, Actual Result + Pass/Fail record karna, phir Bug Reporting, Smoke/Sanity/Regression Testing, Responsive/Cross-Browser Testing, Basic SQL aur Postman/REST API practice.
