Manual QA Testing Portfolio

Aqsa Shoukat | Software tester | Faisalabad, Punjab, Pakistan

Open to remote opportunities

What this portfolio shows

I test websites and Android apps by hand on my own phone. In each one I try the normal flow first and then wrong or unusual input, like empty fields, letters in number fields, zero, negative numbers and values that are too long. Every report says what I did not cover or test, because I only want to claim what I really tested. The results are my own judgement because I had no requirements documents.

Reports

Report	What I tested	Date	Result
ParaBank	Online banking demo	6 Oct 2026	48 cases: 28 passed, 18 failed, 2 other
OrangeHRM	HR system demo	17 Oct 2026	17 cases: 12 passed, 1 failed, 4 observations
CURA Healthcare	Appointment booking demo	16 Oct 2026	10 issues from exploratory testing on a phone
Swagger Petstore	Public API, tested with Swagger UI	18 and 19 Oct 2026	11 cases: 10 passed, 1 failed
SauceDemo	Online shop demo and test case table	Sept and Oct 2026	23 cases: 23 passed
Buggy Cars Rating	Car rating site	Sept 2026	7 defects: 1 Critical, 2 High, 3 Medium, 1 Low
Buggy Cars in Jira	Bug tickets BCBT-1 to BCBT-7	Sept 2026	7 tickets in To Do
Website status check	Mini Postman on saucedemo.com	Sept 2026	3 GET requests
Wikipedia app	Android app: search, reading, saving, airplane mode	23 and 24 Oct 2026	26 tests: 23 passed (9 with a note), 3 partly tested. No real bug
Google Keep app	Android notes app	Oct 2026	12 tests: 12 passed (2 with a note). No real bug
Daraz app	Android shopping app, as a visitor	Oct 2026	14 tests: 14 passed (10 with a note). Cart needs a login, not tested

Tools

Android phone browser for web testing, Android apps on my own phone (Wikipedia, Google Keep and Daraz), Swagger UI and Mini Postman for requests, Jira for bug tickets, and screenshots with the phone clock visible.

What I am learning next

- Writing more functional test cases from my exploratory notes
- Testing a shopping app where I can log in and test the cart
- Testing more mobile apps, including slow internet and low battery

All testing was done by me by hand on my phone. I used AI tools to help with the layout and wording of these documents.
